

Declaration of non-use of Substance restricted under European RoHS Directive

The European Directive 2011/65/EU and its amendment Directive (EU) 2015/863, restricts the use of certain flame retardants, phthalate esters and heavy metals in electrical and electronic equipment to 0.1% (w/w), the only exception being cadmium with a limit of 0.01% (w/w). Restricted substances as below:

- Lead
- Mercury
- Cadmium
- Hexavalent chromium
- Polybrominated biphenyles (PBB)
- Polybrominated diphenyl ether (PBDE)
- Bis(2-ethylhexyl) phthalate (DEHP)
- Butyl benzyl phthalate (BBP)
- Dibutyl phthalate (DBP)
- Diisobutyl phthalate (DIBP)

To the best of our current knowledge, supplier information, and internal compliance management procedures, substances in above list are not intentionally used in products supplied by **Polymaker**.

Due to the complexity of raw material supply chains, manufacturing, transportation, storage, and possible environmental background contamination, trace-level impurities or non-intentionally added substances (NIAS) cannot be fully excluded. To manage such risks, we actively monitor regulatory updates, obtain composition and impurity information from suppliers, conduct screening and random testing of raw materials and finished filament products, and continuously perform risk assessments on materials, formulations and production processes. Therefore, according to the present scientific knowledge, potential traces of these substances in our products, if any, are well below levels of concern and/or thresholds.
